

6 Steps to a Better Landscape

Manage your yard like a Pro

1

Clean loose debris from lawn areas.

The softer ground and dormant grass is ideal for raking thatch and lawn debris

2

Fertilize your lawn and landscape plants

Spring moisture levels ensure a good feeding when applied properly with Spring moisture levels that ensure a good breakdown of applied chemicals

3

Prune dead dying or diseased ornamental tree branches

Go after those exposed branches, better now than when the leaves are on the tree

4

Install Lawn and or bed weed control pre-emergent

For best control of spring and summer germinating weeds apply pre-emergent weed control evenly and thoroughly and allow the consistent spring moisture to do its thing

5

Select perennials, trees and shrubs for your landscape

Best plants and pricing value available now

6

Cut divide and transplant perennials Spring is the time

Now is your greatest opportunity for success and season long beauty
